

Members are requested to:

- NOTE this report and CONSIDER the recommendations

Agreed at the last Parish Meeting at Minute Reference 22.61

Members considered the recommendation to replace the missing bollards outside the players entrance. After discussions, Members RESOLVED to install two removable bollards using the remaining funds set aside from CIL funding for the project. Members DELEGATED to the Chairman, Vice-Chairman and Clerk to complete the project with the agreed specifications.

Field Access – Removable Bollards

To supply and install 2 x removable bollards will cost £900, there is a possibility than extra fixed bollards (max 2) may be required at the vehicle access point. Unfortunately, the Contractors turned up when the Handyman was on annual leave, the Council was not made aware of their visit beforehand, if so the bollard locations would have been marked up.

The Contractor is going to meet with the Handyman, w.c. 5 September 2022. There may be no requirement for additional fixed bollards, but in anticipation, Members are requested to CONSIDER setting a budget of £300, delegated to the Chairman, Vice-Chairman and Clerk to complete the project.

White Lining

A quote has been received to remark all existing road markings in the car park for the sum of £700 (ex VAT)

The Parish Council has the option to borrow line marking equipment from a local Council, the Parish Council would then need to purchase the materials at a cost of up to £100.

Recommendations

- To agree to the additional costs to install a maximum of two bollards (if required) of £300 with delegation to Chairman, Vice-Chairman and Clerk to complete the project.
- To consider the options available for remarking of the car park
- To agree the funding of the chosen option, costs met from General Reserves
