

Members are requested to NOTE this report and CONSIDER the recommendation.

Background

On the Website Meeting pages, the Council has attachments from previous meeting displayed. It is normal practice for attachments to be removed, because once the Council has made a resolution, the background reports are not relevant. The website page also looks disjointed and untidy.

The background documents are kept on the Council server, if an issues needs to be revisited or historic meeting data is required in can be retrieved.

Recommendation

To remove all meeting reports/ background documents from the website leaving only the Agenda and Minutes.
